Program 1

Write a code in PL/SQL to develop a trigger that enforces referential integrity by preventing the deletion of a parent record if child records exist.

```
CREATE OR REPLACE TRIGGER prevent_parent_deletion
BEFORE DELETE ON employees
```

```
FOR EACH ROW
```

```
DECLARE
```

```

records exist.');
```

```
END IF;
```

```
END;
```

```
DELETE FROM employees
WHERE employee_id = 70;
```

## Program 2

Write a code in PL/SQL to create a trigger that checks for duplicate values in a specific column and raises an exception if found.

```
CREATE OR REPLACE TRIGGER prevent_duplicate_manager_id  
BEFORE INSERT OR UPDATE ON employees

```

```
DECLARE

The screenshot shows the SQL Developer interface with a yellow error message box. The message states: "ORA-20003: Duplicate manager\_id found: 400" and "ORA-00512: at 'WSP\_SUBTRACTA.PREVENT\_DUPLICATE\_MANAGER\_ID', line 10". Below the error message, the SQL statement is displayed: "1. ### Program 3

```

A screenshot of a SQL execution window with a dark background. The window has tabs for 'Results', 'Explain', 'Describe', 'Saved SQL', and 'History'. The 'Results' tab is active, displaying a yellow-highlighted error message. The message reads: 'ORA-20004: Insertion denied: total salary exceeds the threshold of 100000' followed by 'ORA-00512: at "MSP\_SUPERMUSA.RESTRICT\_SALARY\_INSERTION", line 18' and 'ORA-04088: error during execution of trigger' and 'MSP\_SUPERMUSA.RESTRICT\_SALARY\_INSERTION'. Ex.No.: 16	CONTROLLING USER ACCESS
Date: 03/10/2024	

1. What privilege should a user be given to log on to the Oracle Server? Is this a system or an object privilege?

The privilege a user should be given to log on to the Oracle Server is the CREATE SESSION privilege.

Type of Privilege: This is a system privilege. GRANT  
CREATE SESSION TO username;

2. What privilege should a user be given to create tables?

the user needs the CREATE TABLE privilege.

The CREATE TABLE privilege allows the user to create new tables in their own schema.

GRANT CREATE TABLE TO username;

3. If you create a table, who can pass along privileges to other users on your table?

When you create a table, only you as the table owner (or a user with the ADMIN OPTION or GRANT ANY PRIVILEGE system privilege) can grant privileges on your table to other users.

GRANT SELECT ON your\_table TO other\_user;

4. You are the DBA. You are creating many users who require the same system privileges. What should you use to make your job easier?

As a DBA, to simplify the process of granting the same system privileges to multiple users, you should use roles.

```
CREATE ROLE my_role;
```

```
GRANT CREATE SESSION TO my_role;
```

```
GRANT CREATE TABLE TO my_role;
```

```
GRANT my_role TO user1;
```

```
GRANT my_role TO user2;
```

5. What command do you use to change your password?

```
ALTER USER username IDENTIFIED BY new_password;
```

6. Grant another user access to your DEPARTMENTS table. Have the user grant you query Access to his or her DEPARTMENTS table.

Grant Access to Your DEPARTMENTS Table

```
GRANT SELECT ON your_username.DEPARTMENTS TO other_user;
```

Grant Query Access to Other User's DEPARTMENTS Table

```
GRANT SELECT ON other_user.DEPARTMENTS TO your_username;
```

7. Query all the rows in your DEPARTMENTS table.

```
SELECT * FROM DEPARTMENT;
```

8. Add a new row to your DEPARTMENTS table. Team 1 should add Education as department number 500. Team 2 should add Human Resources department number 510. Query the other team's table.

```
INSERT INTO DEPARTMENT(dept_id,

VALUES (500, 'Education',300,12,'BAN','ball');
```

```
INSERT INTO DEPARTMENT(dept_id,

(510, 'Human Resources',150,10,'AUS','john');
